PPF & Wrap Q-Detailer

Detail Spray and Quick Sealant for PPF & Wrap Films

PPF & Wrap Q-Detailer is part of the fillium product line and serves combines a detailing spray and a quick sealant. It is based on Hydro-Ceramic technology and is particularly user-friendly. After application, it forms a very thin, water-repellent protective film. This film enhances the dirt-repellent properties of the treated film and improves its visual appearance. The surface gains a more intense shine as well as visibly enhanced color depth and surface smoothness.

The PPF & Wrap Q-Detailer was specially developed for the care and protection of untreated PPF, wrap, and vinyl films. It is also ideal for new vehicles and display vehicles with film, as well as for a quick finish after washing the vehicle. It can also be used to effectively refresh film surfaces that are already protected—for example, after applying Hydro Ceramic Shampoo, Hydro Ceramic Foam, or Hydro Ceramic Wet Coat. Even permanently coated film surfaces that have been sealed with PPF & Wrap Coat can be maintained with the PPF & Wrap Q-Detailer. Regular use can preserve the protective performance of the coating for longer.

PPF & Wrap Q-Detailer is versatile and can be used on wrapped exterior surfaces of cars, caravans, boats, motorcycles, and similar vehicles.

Application:

- Untreated PPF, wrap, and vinyl films (glossy and matte)
- Sealed PPF, wrap, and vinyl films (glossy and matte)
- Car wrapping film (glossy and matte)
- Vehicle graphics / advertising elements

Properties:

- Strong water-repellent effect
- Enhances gloss, color depth, and surface smoothness
- Resistant to weak acids and bases
- Quick and easy application
- Low product consumption

Use:

- Spray PPF & Wrap Q-Detailer thinly and evenly onto the previously thoroughly cleaned and completely dry surface.
- Then spread the product evenly and work it in using a clean, soft microfiber cloth, such as the Premium Buffing Towel. Work the product into the surface until it appears almost completely dry or is only minimally visible.
- Then buff away any remaining product residue with a fresh, dry microfiber cloth until a uniform, high-gloss, streak-free finish is achieved.
- If slight streaks or residue become visible later, they can be removed with a clean microfiber cloth. For residue that have already bonded more firmly to the surface, apply a small amount of fresh product to the microfiber cloth or the affected area to gently loosen the residue. Then buff it off immediately.

Caution: Do not apply directly in the sun or on hot surfaces! Apply the product quickly and do not let it dry!

Lifetime:

PPF & Wrap Q-Detailer provides protection for approximately 5–8 weeks.

Application temperature:	Consumption:	Weatherproof:	Fully cured:	pH resistance
+10°C to +35°C	3–5 ml per m²	After 30 minutes	After 24 hours	pH 3.0–11.0

Storage temperature:	Storage and shelf life:
10°C to +25°C	At least 24 months at room temperature in tightly sealed original containers when stored upright.

Caution: Protect the product from direct sunlight and freezing temperatures!

Note:
Emulsions and coating products need a certain period of time to bind to the surface and fully cure after application. Therefore, please check the curing time of individual products. Only this can guarantee that the product provides the desired benefits. Direct exposure of the surface to water or cleaning agents after application can considerably reduce the product's properties.

General information about the product:
Factors such as preliminary cleaning, application temperature, curing time, etc., can influence the product's effectiveness and lifetime. Therefore, fluctuations of product properties cannot be excluded.

Container sizes:

Art. No.:	Container:
SF10513	750 ml
SF10513.1	5 liters

Accessories:
Premium Buffing Towels, Premium Allround Towels, Surface Cleaner Ultima, Surface Cleaner Neutra, Wash Concentrate, Shampoo Plus, Reactive Cleaner

Important notes after use:
Surfaces that have been treated with paint care products should always be cleaned as gently as possible to avoid damaging or even removing the product. Avoid using harsh cleaning agents with a high pH or a high solvent content. We therefore recommend cleaning with a pH-neutral shampoo.

This product information should and can only be taken as non-binding advice. The manufacturer does not accept any liability whatsoever. Before use, make sure that the product is suitable for your particular application.
