

Medium Cut

Micro fine abrasive paste

servFaces Medium Cut is a modern, efficient, silicone-free polish for quick reconditioning of moderately weathered paintwork and for the removal of light scratches. The polish effectively removes paint mist and sanding from grit size P2000 upwards. Due to the highly abrasive and very uniform grit, servFaces Medium Cut produces a high cut with a high gloss grade. With servFaces Medium Cut you can polish for an extremely long time with little dust and spattering without the polish burning in. servFaces Medium Cut is very easy to wipe off with the Premium Buffing Towel and is excellent for all types of paintwork, both soft and scratch-resistant.

Areas of application:

Suitable for paints on cars, motorcycles, commercial vehicles, etc.

Properties:

Grinding grade: 8.0

Gloss grade: 8.0

Use:

Apply servFaces Medium Cut evenly to the surface to be worked on and polish using a rotary polishing machine with a servFaces medium cut or fine cut polishing sponge (for grinding from grit size P2000) in a crosswise motion at medium speed and medium pressure. For processing with an eccentric polishing machine, please use a servFaces medium cut or fine cut polishing sponge. To remove polish residues, it is best to use a microfiber cloth such as the servFaces Premium Buffing Towel. The best possible surface is achieved by repolishing with servFaces Fine Cut and Ultra Fine Cut.

Caution: Do not apply the product in direct sunlight and do not let it dry!

Warning:

Shake well before use. Check for suitability and compatibility before use. Do not apply to hot surfaces and protect from excessive heat and frost.

Application temperature:
+10°C to +30°C

Storage temperature:
+10°C to +25°C

Consumption:
6 to 10 ml per m²

pH:
Not determined

Storage and shelf life:

At least 12 months at room temperature in tightly sealed original container.

Protect from direct sunlight and freezing temperatures!

Container sizes:

Art. No.:	Container:
SF10422	250 ml
SF10422.1	1000 ml
